## **About Induction Program**

When new students enter an institution, they come with diverse thoughts, backgrounds and preparations. It is important to help them adjust to the new environment and inculcate in them the ethos of the institution with a sense of larger purpose. Precious little is done by most of the Institutions, except for an orientation program lasting a couple of days.

We propose a 3-week long induction program for the UG students entering the institution, right at the start. Normal classes start only after the induction program is over. Its purpose is to make the students feel comfortable in their new environment, open them up, set a healthy daily routine, create bonding in the batch as well as between faculty and students, develop awareness, sensitivity and understanding of the self, people around them, society at large, and nature.

The time during the Induction Program is also used to rectify some critical lacunas, for example, English background, for those students who have deficiency in it.

The following are the activities under the induction program in which the student would be fully engaged throughout the day for the entire duration of the program.

- 1. Induction Day Program- Inaugural Function (with Speech of Chairman and Principal)**
- 2. Physical Activity**
- 3. Creative Arts**
- 4. Universal Human Values**
- 5. Literary**
- 6. Proficiency Modules**
- 7. Lectures by Eminent People**
- 8. Visits to Local Area**
- 9. Familiarization to Dept. /Branch & Innovations**

Mauli Group of Institutions's, College of Engineering & Technology hosted the Induction Program, a unique fusion of specially engineered academic and non-academic activities, to nurture, and fortify engineering entrants for the days to come. The one week phase commencing from 17<sup>th</sup> August 2023 to 23<sup>th</sup> August 2023 marked the implementation of the induction program which was college management and celebrated in high fervor by the team of expert faculties of the institution.

Total 352 students from different branches of engineering participated enthusiastically and obtained benefit from the program. They were provided the cursory view of various dimensions of engineering and the career opportunities in the field and the systems and procedures of the college to ease their transition to the core engineering program. They were enlightened about the prospective scope of the arena that they had opted for their success.

The college committee for Induction Program invited experts from different leading industries and esteemed institutions to interact with the entrants and brief the learners with their expertise in various fields. Along with expert talks, the students were exposed to village visit and industrial visits for catering their social as well as technical side of learning
